EPIPEN® AND EPIPEN® JR. DIRECTIONS

Pull off gray activation cap.

Hold black tip near outer thigh (always apply to thigh).

- Swing and jab firmly into outer thigh until Auto-Injector mechanism functions. Hold in place and count to 10. Remove the EpiPen® unit and massage the injection area for 10 seconds.
- Once EpiPen® is used, call the Rescue Squad. State additional epinephrine may be needed. Take the used unit with you to the Emergency Room. Plan to stay for observation at the Emergency Room for at least 4 hours.

For children with multiple food allergies, consider providing separate Action Plans for different foods.

AllergyActionPlan: Revised 5/13/09
